Read output from Shell Command

```
// Execute the shell with the `-c [command]` parameter in order to
// inherit the shell environment
let process = Process()
process.launchPath = "/bin/sh"
process.currentDirectoryPath = ...
process.arguments = [ "-c", ... ]
let output = Pipe()
process.standardOutput = output
process.launch()
let data = output.fileHandleForReading.readDataToEndOfFile()
```
